## General marking principles for National 5 Art and Design

*Always apply these general principles. Use them in conjunction with the detailed marking instructions, which identify the key features required in candidates' responses.*

- (a) Always use positive marking. This means candidates accumulate marks for the demonstration of relevant skills, knowledge and understanding; marks are not deducted for errors or omissions.
- (b) If a candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- (c) It is possible that some candidates could have investigated artists and designers who are not known to the marker. In such cases, markers are expected to research the artists/designers before marking the response.
- (d) Markers should consider the extent to which the candidate's response demonstrates their knowledge and understanding of art and design practice.
- (e) Marks should not be awarded for mere descriptive comment. At this level, candidates are expected to justify their answers. To gain marks, candidates must develop points made.

For example, *'The painting has bright colours'* would not gain a mark as it is simply descriptive, but

*'The painting has bright colours and the use of warm vivid colours on the flowers makes them stand out as they contrast with the cool colours in the background'*, would gain a mark, as this answer shows an understanding of colour theory.

- (f) No marks should be awarded for simply repeating information from the legend. Where candidates develop and use this information to justify their opinion or qualify their answer, credit can be given.
- (g) To gain full marks, candidates must have responded to all aspects of the question. **8 marks** are available for responding to the prompts relating to expressive art or design issues.
  - if the candidate responds to only two of the three prompts effectively, then **1 mark** cannot be accessed and a **maximum of 7 marks** can be gained by the candidate for this aspect of the question.
  - if the candidate responds to only one of the three prompts effectively, the candidate can gain a **maximum of 6 marks** for this aspect of the question.
- (h) The questions also require candidates to give an opinion with justified reasons which are worth **2 marks**. Candidates must make two valid and substantiated points relating to the question to gain both marks.

## Overview

National 5 level candidates are required to demonstrate knowledge and understanding of key art or design issues, and knowledge and understanding of the work of at least two artists or two designers. The format of the questions reflects this emphasis. The paper is divided into Section 1: Expressive Art Studies and Section 2: Design Studies and each is equally demanding.

The questions are designed to test candidates' ability to respond critically to images of art or design works and to form and substantiate judgements about identified aspects of art practice or design issues.

The questions require candidates to demonstrate their understanding of art and design issues in an **extended response format**.

### Mandatory questions (Q1 and Q7)

In these questions, candidates are required to demonstrate knowledge and understanding of key art or design issues and knowledge and understanding of the work of two artists or two designers. Candidates are expected to provide substantiated reasons to support their personal opinions.

The questions are divided into two parts

#### Part (a)

This part of the question assesses the candidates' ability to comment on the art or design works with explicit reference to the use of visual art/design elements and to express justified opinions on the identified examples of the work.

One mark should be awarded for each relevant, justified point, which responds to the question prompts up to a **maximum of 10 marks**.

Candidates are expected to demonstrate their knowledge and understanding with reference to specific artworks/designs.

Candidates who discuss only one artwork or design can only gain a **maximum of 6 marks**. Where this occurs, marks should be awarded as follows

- a **maximum of 4 marks** are available for discussing artwork with reference to one artist's use of the specific elements
- a **maximum of 2 marks** are available for giving an opinion on a specific aspect of the artist's or designer's work with two justified reasons.

## Part (b)

This part of the question assesses the candidates' knowledge and understanding of the impact of social, cultural and other influences on the work and practice of a selected artist or designer from part (a).

One mark is awarded for each correct influence identified up to a **maximum of 2 marks**.

A **maximum of 3 marks** are available for describing how the influences can be seen in any of the selected artist's or designer's work.

Examples of social and cultural influences may include

- living conditions, including economic conditions
- influence of family and community
- influence of other artists/designers
- influence of art/design movements
- exposure to different cultures
- physical environment/geography
- new and emerging technology
- politics
- gender
- religion/belief
- national/world events
- developments in other fields for example science, literature
- personal circumstances
- health and wellbeing.

In Section 1, Expressive Art Studies, question 1 part (a), candidates will respond by commenting on two works of art with a common stimulus/theme. They will be asked about specific issues in relation to the works they have selected.

In question 1 part (b), candidates will select one artist from part (a) and explain the impact of social, cultural or other influences on their work and practice. It is acceptable for candidates to refer to the artwork discussed in part (a) or the artist's work in general.

In Expressive Art Studies questions, where the term 'artwork' is used it should be interpreted in its broadest sense, covering painting, printmaking, photography, sculpture, installation, animation, film and video.

Candidates may also refer to groups of artists rather than individuals (for example artists who work in pairs/groups such as the Boyle family), and this is acceptable.

In Section 2, Design Studies, question 7 part (a), candidates will respond by referring to two specific examples of designers' work. They will be asked about visual aspects and functional design issues in relation to the works they have selected.

In question 7 part (b), candidates will select one designer from part (a) and explain the impact of social, cultural or other influences on their work and practice. It is acceptable for candidates to refer to the design discussed in part (a) or to the designer's work in general.

In the Design Studies questions, the term 'design' should also be inclusive of any form of design. Occasionally candidates may refer to collections of designs (particularly in fashion/textiles answers), and this is acceptable.

Candidates may also refer to groups of designers rather than individuals (for example Alessi or Timorous Beasties), and this is acceptable.

## Optional questions (Q2–6 and Q8–12)

Candidates are asked to choose and respond to **one** other question from their chosen section of the paper.

In each section, there is a **choice of five** different questions for personalisation and choice. These questions require candidates to give a personal response to one selected image from the choice of supplied questions and images in each section. They will demonstrate their understanding of specialist art or design vocabulary when commenting on key aspects of art or design practice and justifying their answers and opinions.

In Section 1, Expressive Art Studies, they will comment on an unseen image, demonstrating an understanding of important aspects of the artist's work.

In Section 2, Design Studies, they will comment on an unseen image, demonstrating understanding of specific design issues.

Each of these questions asks candidates to

- comment on the artist's/designer's methods or approach and/or their use of specific elements in the artwork/design shown
- give their opinion on a specific aspect of the work, justifying their opinions.

One mark should be awarded for each relevant, justified point, which answers the question up to a **maximum of 10 marks**. Markers should follow the specific marking guidance for each aspect of the questions provided in the table.

Marks should not be awarded for mere descriptive comments. To gain marks, candidates must develop or justify points made.

Substantiated comments and valid, justified personal opinions relating to the question should be rewarded. These opinions can be either positive or negative.

If a candidate answers more than one optional question in either section of the question paper, the answers should be marked and the response that gains the highest marks should be recorded.

			Monet was influenced by the Impressionist movement. This can be seen in The Cliffs at Étretat as he has captured the effect of the weather in his broken brushstrokes. The Impressionists used optical mixing. Monet has used this technique in the painting as colours were applied in dashes next to each other and these 'mix' in the eye of the viewer.	3	A specific and correct influence is identified. <b>(1 mark)</b> A clear description is given of how the influence can be seen in a specific work. <b>(1 mark)</b> An additional point describes another way the influence can be seen in the work. <b>(1 mark)</b>
